November 23, 1982

The Honorable William P. Clements
Governor of Texas
Capitol Station
Austin, Texas 78711

Dear Governor Clements:

The Texas Legislature has charged the Railroad Commission with the responsibility for regulating gas utility companies in Texas. The Commission has original jurisdiction over rates, operations, and service of natural gas sales in unincorporated areas, in addition to de novo appellate review of municipal action.

The Gas Utilities Division performs the day-to-day regulatory activities on behalf of the Commission. In this Annual Report for Fiscal 1982, the Gas Utilities Division presents all information as required by law, plus pertinent 1981 data obtained from the many gas utilities in Texas.

The Gas Utilities Division operated on a budget of $1,976,351 in 1982. During the fiscal year, the Division's staff averaged 63 employees. To best fulfill its responsibilities, the Division is organized into five activities: Auditing, Safety and Engineering, Hearings and Legal Analysis, Reports and Statistics, and Program Management.

The Auditing Section is charged with auditing 270 annual gas utility reports and other filings required by Commission orders. To verify use of a uniform system of accounts, the staff (with personnel in five Texas cities) goes into the field to examine the books in gas utility company offices. The Auditing Section is also responsible for collecting a gross receipts tax of one-fourth of one percent of a utility's gross revenues. Carrying out these mandates in fiscal year 1982, the Auditing staff conducted 138 audits and collected $35,669,320 in gross receipt taxes.

The goals of the Safety and Engineering Section are to preserve human life and to prevent the destruction of property and natural resources. With personnel in seven Texas cities, the Section enforces the minimum safety standards adopted by the Commission for the safe transportation and delivery of natural gas by intrastate pipelines. In the 1982 fiscal year, the Safety staff performed 915 safety evaluations, 35 accident leak investigations, and 118 special investigations for Texas cities.

The Hearings and Legal Analysis Section holds hearings to gather evidence concerning gas utility applications, analyzes the evidence, and recommends disposition to the Commission. In 1976, the year in which the Public Utility Regulatory Act became effective, the Railroad Commission granted 69.17% of the additional revenues requested by utility companies in rate proceedings. That figure fell to 35.56% in 1979 and 22.72% in 1981.

The average rate of return to common equity granted in 1976 was 21.39%. That figure, too, fell steadily to less than 14% in 1978 and has remained in the 13% to 14% range in each year since.

In fiscal 1982, the Section received 470 applications. Of the applications filed, 63% were to set rates in the unincorporated areas immediately surrounding municipalities, called "environs," 19% were to set pipeline or industrial rates, and 3% were to set city gate or rural burnertip rates, all of which are within the Commission's original jurisdiction. Only two applications were filed within the Commission's appellate jurisdiction as appeals from the city rate determinations.

The Reports and Statistics Section gathers data from the gas utilities subject to Commission regulation. The Section conducts research and publishes reports on matters of relevance to Commission responsibilities. The Section keeps a computer record of all dockets filed, has on file approximately 13,678 current gas utility tariffs, and monitors compliance with docket orders and tariff matters. Furthermore, the staff responded to 2,400 complaints and inquiries from the general public in fiscal year 1982.

Program Management plans, organizes, coordinates and controls the operation of the other Sections. It is also responsible for fiscal matters, rulemaking proceedings, statutory notices, and communication between the Division and other parts of the Commission.

In accordance with TEX. REV. CIV. STAT. ANN. art. 6061, (Vernon 1980), we hereby transmit the Annual Report of the Gas Utilities Division of the Railroad Commission of Texas for Fiscal Year 1982.

Respectfully submitted,

James E. (Jim) Nugent, Chairman

*Degree-days measure the deviation from normal temperature by accumulating the difference between 65°F and the daily mean temperature. A mean temperature of 60° for one day would be five heating degree-days. A greater number of heating degree days than normal indicates colder weather. Less heating degree-days than normal indicates warmer weather. These figures are on a calendar year basis. Colder periods in each heating season may fall either before or after year end.
